

# TABLE D'ADDITIONS

allant de 1 à 20, et ceci sur  
**dix** chiffres  
pour mieux savoir compter sur ses  
**doigts**  
lesquels sont au nombre de 10,  
généralement...

$20 + 10 = 30$

Cette  
*Table d'additions* a  
été composée par Alain  
Hurtig le 7 février 1997, à la  
demande de son fils Martin –  
lequel, nul ne l'ignore, aime les  
chiffres et les nombres, aime com-  
pter, et de façon générale se montre  
curieux de tout. La typographie  
est en Didot Linotype. La  
notion de « table » remonte  
à Pythagore, pour le  
moins.
